

Scope

Nuncius, the *Journal of the Material and Visual History of Science* (NUN), is a peer-reviewed, international, biannual journal devoted to the historical role of material and visual culture in science. *Nuncius* explores the material sources of scientific endeavor, such as scientific instruments and collections, the specific settings of experimental practice, and the interactions between sciences and arts. The materiality of science is a fundamental source for the understanding of its history, and the visual representation of its concepts and objects is equally crucial. *Nuncius* focuses on the exploration of increasingly-varied modes of visual description of observed reality. Founded in 1976, *Nuncius* was originally published as *Annali dell'Istituto e Museo di Storia della Scienza*. A rich review section covers the main contributions to the field.

When you submit your manuscript please include a separate title page which includes the full title of the manuscript plus the names and complete contact details of all authors. All other files (manuscript, figures, tables, etc.) should not contain any information concerning author names, institutions, etc. The names of these files and the document properties should also be anonymized.

Submission Requirements

Language

The main language of the journal is English but contributions in French and German are also considered. For manuscripts in English, spelling (British or American) should be consistent throughout.

If your article contains non-Roman scripts (e.g., Greek) please also submit a pdf file in which all non-Roman characters are displayed correctly. For more information on handling non-Roman scripts, please also see the sections on the Brill Author Gateway website online: fonts and Unicode: brill.nl/files/brill.nl/metrical-characters-unicode-updated.pdf; special scripts and transliteration: brill.nl/downloads/Handling-Transliteration.pdf. All fonts must be embedded.

Citations

In the running text “double quotation marks” are used unless the “quotation is ‘within’ another.” Citations outside the running text are without “double quotation marks.”

Figures

Each article is allowed up to a maximum of six images in black and white. Any exceptions to this must be agreed upon directly with the Editor.

All figures must be cited consecutively in the text. Figures should be submitted as separate source files in .eps, .tif, or .jpg format, in a size suitable for the typesetting area of the journal. The resolution of these files should be at least 300 dpi for half-tone figures, and 600 dpi for line drawings. Number the files, and indicate in the manuscript where they are to appear (Fig. 1 here). The text in a figure must be legible, and should not be smaller than point 7. The size of this lettering for any text in a figure should be the same for all figures in the manuscript. The figure number, title, caption, and notes should be provided at the end of the manuscript. In exceptional cases a limited number of color images might be included. The Editor will determine which illustrations will appear in color in the printed journal. Figures that appear in black and white in the print edition of the journal will appear in color in the online edition, assuming that color originals are supplied.

Publication

Proofs

Upon acceptance, a PDF of the article proofs will be sent to the author by e-mail to check carefully for factual and typographic errors. Authors are responsible for checking these proofs and are strongly urged to make use of the Comment & Markup toolbar to note their corrections directly on the proofs. At this stage in the production process only minor corrections are allowed. Alterations to the original manuscript at this stage will result in considerable delay in publication and, therefore, are not accepted unless charged to the author. Proofs should be returned promptly.

E-offprints

A PDF file of the article will be supplied free of charge by the publisher to the corresponding author for personal use. Brill is a RoMEO green publisher. Authors are allowed to post the pdf post-print version of their articles on their own personal websites free of charge. This means they can show the article exactly as it appears in print. The institute employing the author is allowed to post the post-refereed, but pre-print version of articles free of charge on its repository. The post-refereed, pre-print version means the final accepted version of the manuscript before typesetting.

Consent to Publish

Transfer of Copyright

By submitting a manuscript, the author agrees that the copyright for the article is transferred to the publisher if and when the article is accepted for publication. For that purpose the author needs to sign the **Consent to Publish** which will be sent with the first proofs of the manuscript.

Open Access

In case the author wishes to publish the article in **Open Access** he/she can choose the **Brill Open** option, which allows for a non-exclusive Open Access publication in exchange for an Article Publishing Fee, and sign a special **Brill Open Consent to Publish**.

More information on Brill's policy on Open Access can be found on brill.nl/open-access-policy.

The Brill Open Consent to Publish can be downloaded from brill.nl/downloads/BrillOpen-Consent-to-Publish.pdf.
